

UNITED STATES DISTRICT COURT

for the
District of Nebraska

FILED
US DISTRICT COURT
DISTRICT OF NEBRASKA

OCT - 9 2013

OFFICE OF THE CLERK

In the Matter of the Search of
(Briefly describe the property to be searched
or identify the person by name and address)

Goodfellas business at 613/623 South 16th Street,
Omaha, Nebraska, Ruby Venditte, Louis Venditte, and
electronic equipment

Case No. 8:13MJ299

SEALED

APPLICATION FOR A SEARCH WARRANT

I, a federal law enforcement officer or an attorney for the government, request a search warrant and state under penalty of perjury that I have reason to believe that on the following person or property (identify the person or describe the property to be searched and give its location):
Goodfellas business at 613/623 South 16th Street, Omaha, Nebraska, Ruby Venditte (her person), Louis Venditte (his person), cellular telephones, and electronic equipment, specifically identified in paragraphs 1, 3, 4, 6, 7 of attachment A and A-1.

located in the _____ District of _____ Nebraska, there is now concealed (identify the person or describe the property to be seized):

See Attachment B.

The basis for the search under Fed. R. Crim. P. 41(c) is (check one or more):

- ☒ evidence of a crime;
- ☒ contraband, fruits of crime, or other items illegally possessed;
- ☒ property designed for use, intended for use, or used in committing a crime;
- ☐ a person to be arrested or a person who is unlawfully restrained.

The search is related to a violation of:

Code Section

Offense Description

18 U.S.C. § 2421

Transportation for Illegal Sexual Activity

The application is based on these facts:

- ☒ Continued on the attached sheet.
- ☐ Delayed notice of _____ days (give exact ending date if more than 30 days: _____) is requested under 18 U.S.C. § 3103a, the basis of which is set forth on the attached sheet.

ATTACHMENT A

Places to Be Searched

1. Business identified as GOODFELLAS, located at 623 South 16th Street, Omaha, Nebraska, also identified as 613 South 16th Street, Omaha, Nebraska, further described as a two story Black colored brick building with a White sign and Red "GOODFELLAS" and Black "DANCERS" letters that sits North of Jones Street, on the East side of South 16th Street in Omaha, Nebraska. GOODFELLAS has a door facing the west side of the building. See attached photo identified as A-1.
2. The residence located at 1526 Park Wild Avenue, Omaha, Nebraska, 68108, also identified to as 1526 ½ Park Wild Avenue, Omaha, Nebraska, 68108 Street, Omaha, Nebraska further described as a reddish brick house that has a piqued roof. The house faces East but is on the West side of Park Wild Avenue, Omaha, Nebraska. The house is enclosed within a black metal fence that has a gate in front for entry to the property. The front door is covered by a roof. The second story that is visible from the street has two windows. The residence also has a detached garage to the rear. See attached photos identified as A-2 and A-3.
3. Person of RUBY VENDITTE, white female, date of birth 09/01/1948.
4. Person of LOUIS VENDITTE white male, date of birth 08/04/1947.
5. Vehicles associated with LOUIS and RUBY VENDITTE to include:
 - A. Red 2002 Cadillac Seville (Nebraska License plate: 1-V47)

VIN 1G6KS54Y22U136483

and
 - B. White 2002 Chevrolet Blazer (Nebraska License plate: TCP-057) VIN 1GNDT13W22K150558
6. Cellular telephones having associate numbers: (402) 612-9716 and (402) 452-1955

7. Computers, surveillance equipment, cellphones, personal data assistants and other similar handheld devices with electronic storage capability, at the locations referenced in paragraphs 1, 2, and 5(a) and (b).

A-1

ATTACHMENT B

Particular Things to be Seized and Searched

Any records utilizing the following business names: GOODFELLAS, RAVANITE, Inc.,

Records, notebooks, memoranda, receipts, ledgers, photographs, lists and employee or customer information relating to Goodfellas

Books, records, lists, receipts, bank savings and loan records of deposit, statements and other bank records, letter of credit, money orders, cashier's checks, passbooks, cancelled checks, certificates of deposit, lease agreements, loan records, customer account information, financial statements, other financial records,

Personnel records for employees or contractors, including personnel lists and contact information, applications, contracts, and business records pertaining to employment of personnel,

Business records for services named in the affidavit, including records of advertisements for the business names and locations.

Personal and business financial documents including documents indicating business operations and expenses, payment for services, personal and business financial transactions, bank statements, financial statements, and payment records from clients, whether received via mail, hand delivery or electronically Business and massage licenses and certifications.

Client lists, ledgers and records, including names, contact information, records of visits and client ratings.

Calendars and appointment schedules, including paper copies and records stored electronically

Cash and other negotiable instruments

Towels, sheets, pillow cases, lotions, oils, customer skin care products, condoms, wrappers, containers, and similar items used to service clients, and bodily fluids

Indicia of ownership and control of the premises or vehicle, including keys, photographs, utility records, lease agreements, addressed letters and envelopes and vehicle registration

Telephone records including call activity and payment records.

Contact names and telephone numbers, e-mail and mailing addresses, dates and times of contacts, attempted contacts and missed calls, sent, received and stored text messages, voice mails and e-mails, and still photographs, video and audio files, whether stored on paper or electronically in desktop computers, laptop or notebook computers, telephone answering or recording machines, or similar electronic devices

Cellular telephones, personal data assistants and other similar handheld devices bearing the telephone number(s) (402) 612-9716 and (402) 452-1955 and all data stored in such devices, including contact names and telephone numbers, e-mail and mailing addresses, dates and times of contacts, attempted contacts and missed calls, sent, received and stored text messages, voice mails and e-mails, still photographs, video and audio files, dates, appointments and other calendar information, and GPS data

Cellular telephones, personal data assistants and other similar handheld devices and its contents

Cameras, surveillance equipment, recording equipment and monitors, photographs, video recordings, including digital photographs and video stored electronically on devices such as cameras, video recorders, compact disks and DVD's, thumb drives, flash drives, hard drives and other computer hardware.

Countersurveillance equipment, and cameras, communication and relay devices and related equipment for remote video surveillance.

Computer hardware consisting of all equipment which can collect, analyze, create, display, convert, store, conceal, or transmit electronic, magnetic, optical, or similar computer impulses or data. Hardware includes but is not limited to any data processing devices (such as central processing units, memory, typewriters, and self-contained "desktop", "laptop", or "notebook" computers); internal and peripheral storage devices (such as fixed disks, external hard disks, floppy disk drives and diskettes, removable magnetic disk storage drives and disks, tape drives, and tapes, optical storage devices, transistor-like binary devices and other memory storage devices); peripheral input/output devices (such as keyboards, printers, scanners, plotters, video display monitors, and optical readers); and related communications devices (such as modems, cables and connections, network transceivers, recording equipment, RAM or ROM units, acoustic couplers, automatic dialers, speed dialers, programmable telephone dialing or signaling devices, and electronic tone-generating devices); as well as any devices, mechanisms, or parts that can be used to restrict access to computer hardware (such as physical keys and locks).

Computer software consisting of digital information which can be interpreted by a computer and any of its related components to direct the way they work. Software can be stored in electronic, magnetic, optical, or other digital form. It commonly includes programs to run operation systems, applications, utilities, compilers, interpreters, and communications programs. Any and all programs necessary for the proper functioning of the computer system.

Computer-related documentation consisting of written, recorded, printed, or electronically stored material which explains or illustrates how to configure or use the computer hardware, software, or other related items. These materials include items relating to the operation of the aforementioned hardware or peripherals.

Computer passwords and other data security devices designed to restrict access to or to hide computer software, documentation, or data: including data security devices consisting of hardware (such as encryption devices), software (such as programs that

encrypt, compress, hide, or "booby-trap" protected data to make it inaccessible or unreadable as well as reverse the process to restore the data), and programming code (such as code that creates "hot" keys which perform security related functions when activated). Encryption keys or encryption passwords, wherever stored and on whatever medium, including paper or electronic medium.

Related communication devices, such as modems, facsimile machines, telephone equipment with built-in memory devices, and answering machines, together with system documentation, operating logs and documentation, software and instruction manuals. All of the above records, whether stored on paper or magnetic media, such as tape cassette, disk, diskette, or on memory storage devices, such as optical disks, programmable instruments, such as telephone, electronic address books, calculators, or any other storage media, together with indicia of use, ownership, possession or control of such records.

Based on my knowledge and training and the experience of other agents and digital forensic experts with whom I have discussed this investigation, I know that in order to completely and accurately retrieve data maintained in computer hardware or on computer software, to ensure accuracy and completeness of such data, and to prevent the loss of the data either from accidental or programmed destruction, it is often necessary that some computer equipment, peripherals, related instructions in the form of manuals and notes, as well as the software utilized to operate such a computer, be seized and subsequently processed by a qualified computer specialist in a laboratory setting. This is true because of the following:

a. The volume of evidence. Computer storage devices (such as hard disks, sim cards, SD cards, diskettes, tapes, laser disks, etc.) can store the equivalent of thousands of pages of information or images. Additionally, a user may seek to conceal criminal evidence by storing it in random order with deceptive file names. Searching authorities are required to examine all the stored data to determine which particular files are evidence or instrumentalities of criminal activity. This sorting process can take weeks or months, depending on the volume of data

stored, and it would be impractical to attempt this kind of data analysis on-site.

b. Technical requirements. Searching computer systems for criminal evidence can be a highly technical process that can require expert skills and a properly controlled environment. It is often difficult to determine the hardware and software used on a system to be searched before the search is executed, and the vast array of computer hardware and software available requires even computer experts to specialize in some systems and applications. As a result, it is difficult to know prior to a search: (1) whether a specific expert or search protocol may be required; (2) if so, which expert may be qualified to analyze the system and its data; and (3) whether and what type of controlled environment may be required. Data search protocols are exacting scientific procedures designed to protect the integrity of the evidence and to recover even "hidden", erased, compressed, password-protected, or encrypted files. Because computer evidence can be vulnerable to inadvertent or intentional modification or destruction (both from external sources or from destructive code imbedded in the system as a "booby trap"), a controlled environment may be necessary to complete an accurate analysis. Further, such searches often require the seizure of most or all of a computer system's input/output peripheral devices, related software, documentation, and data security devices (including passwords) so that, if necessary, a qualified computer expert can accurately retrieve the system's data in a laboratory or other controlled environment.

Due to the volume of the data at issue and the technical requirements set forth above, it may be necessary that the above referenced equipment, software, data, and related instruction be seized and subsequently processed by a qualified computer specialist in a laboratory setting. Under appropriate circumstances, some types of computer equipment can be more readily analyzed and pertinent data seized on-site, thus eliminating the need for its removal from the premises. One factor used in determining whether to analyze a computer on-site or to remove it from the premises is whether the computer constitutes an instrumentality of an offense and is thus subject

to immediate seizure as such--or whether it serves as a mere repository for evidence, a particular device can be more readily, quickly, and thus less intrusively, analyzed off site, with due considerations given to preserving the integrity of the evidence. This, in turn, is often dependent upon the amount of data and number of discrete files or file areas that must be analyzed, and this is frequently dependent upon the particular type of computer hardware involved. As a result, it is ordinarily impossible to appropriately analyze such material without removing it from the location where it is seized. Based upon my knowledge, training, and the experience of other law enforcement personnel with whom I have spoken, I am aware that searches and seizures of evidence from computers taken from the premises commonly require agents to seize most or all of a computer system's input/output peripheral devices, in order for a qualified computer expert to accurately retrieve the system's data in a laboratory or other controlled environment. Therefore, in those instances where computers are removed from the premises, in order to fully retrieve data from a computer system, investigators must seize all the magnetic storage devices as well as the central processing units (CPUs) and applicable keyboards and monitors which are an integral part of the processing unit. If, after it becomes apparent that these items are no longer necessary to retrieve and preserve the data evidence, such materials and/or equipment will be returned within a reasonable time.

The analysis of electronically stored data, whether performed on-site or in a laboratory or other controlled environment, may entail any or all of several different techniques. Such techniques may include, but shall not be limited to, surveying various file "directories" and the individual files they contain (analogous to looking at the outside of a file cabinet for the markings it contains and opening a drawer capable of containing pertinent files, in order to locate the evidence and instrumentalities authorized for seizure by the warrant); "opening" or reading the first few "pages" of such files in order to determine their precise contents; "scanning" storage areas to discover and possibly recover recently deleted data; scanning storage areas for deliberately hidden files; and performing electronic "key-word" searches through all electronic

storage areas to determine occurrences of language contained in such storage areas exist that are intimately related to the subject matter of the investigation.

Anna Brewer, Special Agent, Federal Bureau of Investigation (FBI), Omaha, Nebraska, being duly sworn, deposes and states:

1. I, Special Agent Anna Brewer, being first duly sworn, hereby depose and state as follows: I am an investigative or law enforcement officer of the United States within the meaning of Section 2510 (7) of Title 18, United States Code (USC), that is, an officer of the United States who is empowered by law to conduct investigations of, and to make arrests for, offenses enumerated herein to include: Title 18 USC Section 371 (Conspiracy to commit offense or to defraud the United States), Title 18 USC 1952 (a) (3), (Use of Facilities in Interstate Commerce in Aid of Racketeering Enterprises), Title 18 USC Section 1952(a)(3), (Interstate transportation in aid of racketeering enterprises), Title 18 USC Section 1591 (a) (1), (Sex Trafficking), Title 18 USC 1591 (a) (2), (Financial Benefit From Sex Trafficking), and Title 18 USC Section 2422, (Coercion and Enticement to travel in Interstate Commerce with Intent to Engage in Illicit Sexual Conduct).

2. Your Affiant, Anna Brewer, is a Special Agent employed by the FBI for approximately eighteen years. Currently SA Anna Brewer is assigned to the Omaha Division. Since her transfer to Omaha, Nebraska in 2009, SA Brewer has worked on child

exploitation cases, sex trafficking, and interstate prostitution cases in and about the Southern District of Iowa and the District of Nebraska. In the last four years, in the Southern District of Iowa and District of Nebraska, she has served/is serving as the lead agent in approximately fifteen sex trafficking/interstate prostitution investigations, regarding violations of Title 18, United States Code, Sections 371, 952, 1591, 2421, and 2422, and in other investigations, including child exploitation, regarding violations of Title 18, United States Code, Sections 2422 and 2423, and has assisted with additional investigations. The sex trafficking investigations in the Southern District of Iowa over the last more than three years have included, along with approximately eight other cases still under investigation, three major prosecutions alleging violations of Title 18, United States Code §§ 1591(a) and 1594(c) (sex trafficking and conspiracy to commit sex trafficking); the Mann Act, including Title 18 United States Code §§ 2421 and 2422 (interstate transportation for prostitution/persuading or coercing interstate travel for prostitution); Title 18, United States Code § 1201 (kidnaping); the Hobbs Act, Title 18, United States Code § 1951(a) (interstate robbery and extortion); and Title 18, United States

Code § 1952(a)(3)(A) (use of facilities of interstate commerce [including the internet and cell phones] in aid of racketeering). These cases have included interstate prostitution including, among others, the states of Iowa, Nebraska, Minnesota, Missouri, Kansas, Colorado, Nevada, Arkansas, Pennsylvania, South Carolina, Alabama, Georgia, Louisiana, and Texas. In three of these cases, eight defendants have been prosecuted. Of these eight defendants, six have been convicted of conspiracy to commit sex trafficking (Title 18 United States Code §§ 1594(c) and 1591(b)(1)); one convicted of interstate transportation for prostitution (Title 18, United States Code § 2421); and one is pending post-trial motions following jury verdicts of guilty on all twelve charged counts of violation of Title 18, United States Code, Sections 371, 1594(c), 1591(a)(1)-(2)/(b)(1), 2421, and 2422(a). The Task Force, of which Anna Brewer is the lead agent, also has a pending trial in the Southern District of Iowa regarding an indictment charging two persons with child exploitation in violation of Title 18, United States Code, Sections 2423(a) and 2423(e).

3. This affidavit is in support of applications for search warrants for the business identified as GOODFELLAS, located at

623 South 16th Street, Omaha, Nebraska, also referred to as 613 South 16th Street, Omaha, Nebraska; for LOUIS VENDITTE, his person, and vehicles associated with LOUIS VENDITTE, further described as a 2002 red Cadillac Seville SLS 4 door sedan bearing Nebraska License plate: 1-V47 Vehicle Identification Number (VIN) 1G6KS54Y22U136483 and a 2002 Chevrolet Blazer 4 door utility bearing Nebraska license: TCP-057 VIN 1GNDDT13W22K150558, the VENDITTE residence located at 1526 Park Wild Avenue, Omaha, Nebraska, also identified as 1526 ½ Park Wild Avenue, Omaha, Nebraska, which includes the detached garage structure; for RUBY VENDITTE, her person, and vehicles associated with RUBY VENDITTE (vehicles described above owned and or used by RUBY and or her husband LOUIS VENDITTE), as well as computers, cell phones, and electronic devices with electronic storage capability located at these locations or on the persons of LOUIS and RUBY VENDITTE.

4. The locations to be searched are described in Attachment A. The items to be seized are described Attachment B. An internet posting that identifies Goodfellas as a "Whore House" is Attachment C. An Internet posting detailing the rules posted online regarding the Whorehouse Challenge is Attachment D.

PROBABLE CAUSE

5. The facts in this affidavit come from my personal observations, my training and experience, and information obtained from other agents, police officers, and witnesses. This affidavit is intended to show merely that there is sufficient probable cause for the requested warrants and does not set forth all of my knowledge of the matter.

INVESTIGATION

6. In August of 2012 the Omaha Police Department received information that there was a business that advertised as a "strip club in Omaha, Nebraska", yet, was a "front" for a prostitution business/brothel. This business was described as a two level structure. Investigation revealed that GOODFELLAS, located at 623 South 16th Street, Omaha, Nebraska, also identified as 613 South 16th Street, Omaha, Nebraska, matched this description. The Douglas County Assessor indicates the location of GOODFELLAS, identified in the attached photograph A-1, as 613 South 16th Street, Omaha, Nebraska. Through surveillance, law enforcement has observed that the address marked on the physical structure, identified in the attached photograph A-1, is "623".

7. In November 2012, the Douglas County Sheriff's Office

received similar information that a "brothel" was being operated at 623 South 16th Street, Omaha, Nebraska, also identified as 613 South 16th Street, Omaha, Nebraska. Since August 2012 until the present the OPD and DCSO collected information from Confidential Human Sources (CHSs) and conducted operations to collect evidence to prove that GOODFELLAS was an establishment, operated by LOUIS and RUBY VENDITTE, that engaged in interstate prostitution and that employees offered commercial sex acts to customers, some of whom traveled in interstate commerce to participate in this illegal activity. In addition, investigation conducted identified DAVID SHIRLEY (also known as "NASH" or "NASHLUV69") as a recruiter, advertiser, and promoter of this business and its illegal activities. In addition to the identification of Subjects, LOUIS and RUBY VENDITTE, and DAVID SHIRLEY, the DCSO conducted surveillance and identified the employees and clients who frequented GOODFELLAS.

8. Based on this information, in February 2013, the FBI initiated an investigation into the allegations that LOUIS and RUBY VENDITTE are engaged in a criminal enterprise to promote interstate prostitution at their business, GOODFELLAS. From investigative contacts, covert operations, Federal Grand Jury subpoenas, court ordered pen registers, court ordered GPS

tracking, and surveillance conducted by law enforcement, it appears LOUIS and RUBY VENDITTE have been the operators of GOODFELLAS in the Omaha, Nebraska, metropolitan area for a number of years and that this business is a "front" for prostitution. They solicit business and recruit customers through their partner, DAVID SHIRLEY.

Information from Omaha Police Department

9. In August, 2012, the Omaha Police Department Vice Unit became aware, through investigation, that there are ongoing events in the greater Omaha, Nebraska, area that are called "Meet and Greet" (or MnG). The purpose of the "Meet and Greet" is for clients to "Meet and Greet" prostitutes, as well as, prostitutes "Meet and Greet" potential clients. After attending a "Meet and Greet", a client could call and arrange to engage in commercial sex acts with one of the prostitutes he met at the "Meet and Greet". DAVID SHIRLEY, (White male, DOB 01/08/1964) is known by law enforcement to attend the "Meet and Greet".

10. In addition to attending the "Meet and Greet", DAVID SHIRLEY is vocal in an online bulletin board website known as www.ECCIE.net (ECCIE stands for Escort Client Communication Information Exchange). ECCIE is an online community/social

media website in which individuals share information about prostitution, places to go to engage in a commercial sex acts and, on occasion, members warn other members of law enforcement vice operations. DAVID SHIRLEY uses the "handle" or screen name "NASHLUV69" and is known by another nickname throughout this community as "NASH".

11. On April 9, 2012, NASHLUV69 posted a statement titled "The Whore House Challenge" (WHC) on www.ECCIE.net (See Attachment D). NASHLUV69's WHC has rules. NASHLUV69 suggests that a person wishing to participate in the WHC "Must have been to a recent M&G"; NASHLUV69 must have seen the participant at a M&G; the participant should have 4 to 5 bills ready to "spend on ho's", and that everything be kept "UTR". Your Affiant knows that "ho's" refers to prostitutes and "UTR" refers to "Under the Radar" and means readers should keep quiet as to not attract law enforcement's attention. Once the participant (client) satisfies the suggestions made by NASHLUV69 and is verified by NASHLUV69, the client can engage in illegal sex acts inside GOODFELLAS.

12. On December 22, 2012, an undercover law enforcement officer, working in an online capacity, using the screen name TRex1176, communicated with NASHLUV69 on www.ECCIE.net. In this

posting thread, TRex1176 states, "What's up brother! Just wanted to give you a shout and see what's up with you. It was great to finally meet you at the MnG. I had a good time finally meeting some of the people from the board, especially the ladies! Anyway, I didn't want to talk about it in front of the other guys, but I was wondering if you were still doing Nash's WH challenge? I didn't think that the MnG was the best place to discuss it, but if you are still up for it, I would be interested in visiting the fine establishment with you. I'm always up for something new.

Anyway, I hope all is well with you and that you have a great Christmas! Take care brother! TRex" (see Attachment C)

13. In a private message on December 22, 2012 at approximately 12:50pm, NASHLUV69 posted, "It's Goodfella's Strip club at 16th & Jones. They are open from 6 to 9, Monday thru Saturday. Have fun!" (see Attachment C)

14. In or about December 2012, an individual identified as Confidential Source (CS) #1 (hereinafter referred to as CS #1) attended a "Meet and Greet" in the Days Inn Hotel located at 11515 Miracle Hills Drive, Omaha, Nebraska. At this "Meet and Greet", CS #1 met DAVID SHIRLEY, aka, NASH, a client and a regular customer at GOODFELLAS. It was through this encounter

that law enforcement was able to determine that DAVID SHIRLEY is the person who uses the screen name and aliases NASHLUV69 and NASH. CS #1 is a paid Confidential Human Source who has been providing information to the Omaha Police Department for over five years. To the extent to which the information CS #1 has provided can be tested, the information has been reliable. CS #1 has a criminal history that includes convictions for state property crimes and traffic offenses. CS #1 also has one federal conviction for being a felon in possession of a firearm.

15. On December 26, 2012, CS# 1, entered GOODFELLAS located at 623 South 16th Street, Omaha, Nebraska, also identified as 613 South 16th Street, Omaha, Nebraska, and met the above mentioned "regular" customer, DAVID SHIRLEY. After meeting CS #1 at a "Meet and Greet", SHIRLEY "trusted" CS# 1 enough to "vouch for" CS# 1 to enter GOODFELLAS and engage in a commercial sex act, as described immediately below. Based on CS#1's friendship with SHIRLEY, SHIRLEY provided a "reference" for CS# 1.

16. Once inside GOODFELLAS, SHIRLEY directed the CS# 1 to a reserved table near the pool table on the North side of the room. SHIRLEY introduced CS# 1 to several customers and ladies working at the bar. SHIRLEY told the staff that CS# 1 was a

friend and he (CS# 1) should get the "same deals" that SHIRLEY receives when frequenting the establishment.

17. During this visit, which was recorded by law enforcement, CS# 1 was able to meet two girls, one named "HOLLY" and one named "NIKKI". The CS# 1 mostly spoke with NIKKI who explained that she could go (with CS# 1) to the upstairs portion of the business in exchange for \$200.00 (two hundred dollars United States currency). NIKKI told CS# 1 that in exchange for \$200.00 (two hundred dollars United States currency) "anything goes" upstairs. The CS# 1 gave NIKKI \$200.00 (two hundred dollars United States currency). NIKKI took the money and turned it over to a female party identified as "RUBY". (RUBY is known to law enforcement as RUBY VENDITTE, wife of LOUIS VENDITTE and co-operator of GOODFELLAS) After the transfer of money, the CS# 1 and NIKKI went upstairs. The sexual encounter upstairs in GOODFELLAS was recorded. Affiant observed this recording which depicts a white male and a female with long hair that matches the description, driver's license and an arrest booking photo of MELANIE JOHNSON, in stages of undress. The actual sex act is not seen on the video but the following is heard and observed by Affiant:

18. At 19:16 hours the white female (MELANIE JOHNSON) is observed looking around the room and on the floor under the bed. She states, "People don't know how to clean up around here they leave condom wrappers..." and at approximately 19:26 hours JOHNSON is heard discussing rubber gloves and the fact that they are "all out of condoms, apparently they went through 100 of them".

19. On January 7, 2013, CS# 1 again entered the GOODFELLAS. This visit was recorded by law enforcement. Affiant listened to the recording and heard the following: CS# 1 ordered some drinks and engaged in conversation with individuals in GOODFELLAS. At approximately 50:20 minutes into the recording, CS# 1 asked (a female who is later identified by law enforcement as MEGAN BIGELOW) if she had "time to hang out more privately?" to which BIGELOW responded (at 50:33 minutes) that it would cost \$200.00 (two hundred dollars) for "all the time you want in the bedroom". At approximately 54:38 the female states, "Wanna wear a condom or not?" At approximately 55:09 the CS# 1 states, "I can get a hand job" to which the female states (at 55:14) "I give great head" and (at 54:22) that she would "lick it all the way up". At approximately 1:13:40 two adults are heard climaxing sexually and the sex acts are complete. At approximately 1:17:15 CS# 1 and BIGELOW discuss

the prices for two girls. BIGELOW tells CS# 1 that the usual price would be \$400.00 (four hundred dollars United States currency) but, since CS# 1 is a "friend of Dave's" (DAVID SHIRLEY), that CS# 1 would be charged \$300.00 (three hundred dollars United States currency). BIGELOW then explains that the price of \$300.00 (three hundred dollars United States currency) is divided, "one hundred for me, one hundred for her, and one hundred for the house". At approximately, 1:17:38 BIGELOW says that way, "everyone gets an even cut".

20. Prior to engaging in the above described commercial sex act, CS# 1 reported that BIGELOW did not have any condoms to use. Because of this, BIGELOW contacted LOUIS VENDITTE downstairs and asked LOUIS VENDITTE to go to BIGELOW's car and get a condom for BIGELOW to use with CS# 1. This is corroborated by surveillance units as SERGEANT JEREMY CHRISTENSEN and DETECTIVE BRIAN MC DOWELL observed LOUIS VENDITTE exit GOODFELLAS Bar and walk towards a Red 1999 Ford Ranger that was parked in the GOODFELLAS parking lot. A Nebraska Department of Motor Vehicle (NDMV) query reveals that a Red 1999 Ford Ranger bearing Nebraska license plate RWR 945 is registered to DAVID SCOTT BIGELOW, residing at 6841 Mayberry, Omaha, Nebraska and an NDMV query indicates that a Nebraska

Driver's license is valid and issued to MEGAN BIGELOW residing at 6841 Mayberry, Omaha, Nebraska. Law Enforcement concludes that LOUIS VENDITTE delivered the condom to BIGELOW for the commercial sex act.

21. The OPD report authored by SERGEANT JEREMY CHRISTENSEN that contains surveillance observations and a summary of the "de-briefing" of CS# 1 was reviewed by Affiant. In this report the following is documented: "At approximately 19:15 hours, R/S (Reporting Sergeant) and Officer McDowell observed a white male party wearing a white t shirt and black driver's cap exit the venue, and walk northbound to a Ford Ranger pickup, NE plate RWR 945, parked in the parking lot located to the north of the venue. R/S recognized this party as VENDITTE, Louis (dob 04 AUG 1947) who had previously been identified as the manager of Goodfellas. R/S observed VENDITTE open the passenger side door to the vehicle, retrieve and (sic) item, and go back inside the venue". In addition, regarding the commercial sex act, the R/S wrote, "The C/I advised that he was able to enter the bar and make contact with a female employee, previously identified through a driver's license photo as BIGELOW, Megan J (dob 25 JAN 1977). The C/I advised that he entered into a conversation with BIGELOW about various subjects, and at one point BIGELOW exposed

her bare breasts to the C/I. The C/I also advised that BIGELOW also displayed her naked genitals to the C/I while sitting in the bar area. BIGELOW then asked the C/I if he would like to go upstairs for \$200.00. BEIGELOW advised the C/I that \$200.00 gets you "all the time you want" and that "anything goes." The C/I agreed and gave BIGELOW \$200.00 United States currency which was provided to the C/I by the R/S. The C/I then watched BIGELOW approach VENDITTE, Louis and hand him the money, which he put into his pants (sic) pocket."

INFORMATION FROM DOUGLAS COUNTY SHERIFF'S OFFICE

22. In a separate, parallel, investigation, on November 27, 2012, the Douglas County Sheriff Office (DCSO) received information from a CS, (hereinafter referred to as CS# 2), stating that a "brothel" was being operated from a business called GOODFELLAS located at 623 South 16th Street, Omaha, Nebraska, also identified as 613 South 16th Street, Omaha, Nebraska. CS# 2 stated that GOODFELLAS was owned and operated by 2 (two) subjects identified as LOUIS VENDITTE (White male, date of birth 08-04-1947) and RUBY VENDITTE (White female, date of birth 09-01-1948) who reside at 1526 Park Wild Avenue, Omaha, Nebraska, also identified as 1526 ½ Park Wild Avenue, Omaha, Nebraska. (The Douglas County Assessor indicates the VENDITTE

residence, identified in the attached photograph, A-2, as 1526 ½ Park Wild Avenue, Omaha, Nebraska. NCJIS indicates both LOUIS VENDITTE and RUBY VENDITTE self-report that their address is 1526 Park Wild Avenue, Omaha, Nebraska. Officers contacted O.P.P.D., which indicated that power utilities for the VENDITTE residence are in the name of LOUIS VENDITTE and RUBY VENDITTE only and have a billing address of 1526 Park Wild Avenue, Omaha, Nebraska. A photograph of the VENDITTE Residence is attached to the affidavit, identified as A-2, which photograph depicts the residence identified as both 1526 Park Wild Avenue, Omaha, Nebraska, and 1526 ½ Park Wild Avenue, Omaha, Nebraska. Through surveillance, law enforcement has observed LOUIS VENDITTE and RUBY VENDITTE park their vehicles in the driveway of the residence, identified in the attached photograph A-2 and A-3. Law enforcement officers conducting surveillance have also observed a detached garage to the rear of the residence, as identified in the attached photograph A-3. The Douglas County Assessor indicates the VENDITTE residence has a detached garage, as identified in the attached photograph A-3.) CS# 2 had this knowledge and additional information about GOODFELLAS because CS# 2 had been (and was, in November 2012, a current) an employee for LOUIS and RUBY VENDITTE at GOODFELLAS. CS# 2

brought this information freely and voluntarily to the DCSO. During the time DCSO operated CS #2, (November 2012 - February 2013) CS #2 was paid a total of \$1,000.00 (one thousand dollars United States currency). After providing information to DCSO, on or about February 8, 2013, CS #2 entered into an agreement with the FBI to act as a Confidential Human Source. Between February 8, 2013 and present, CS #2 has been paid \$1,000.00 (one thousand dollars United States currency) by the FBI for information related to this investigation. CS #2 has a criminal history that includes domestic violence, traffic, financial, and drug convictions.

23. The CS# 2 stated that LOUIS and RUBY were running a "brothel" using the night club as a front. CS# 2 stated that GOODFELLAS Night Club consisted of a seating area, a stage with a dancer pole, a bar and a kitchen area. There was an upstairs area, with access from the main floor, which included three separate rooms, 2 (two) of which are rooms which are used for commercial sex acts. The third room was used by an elderly man named John, as an office. CS# 2 also advised that the kitchen area was actually a gutted kitchen area which contained a couch and was used as an overflow "sex act" area. This gutted kitchen was used, when needed, if the two upstairs rooms were being

utilized by other prostitutes and "Johns" (hereinafter referred to as "clients") for sex acts.

24. According to CS# 2, there is a very limited customer list made up of long time customers, generally middle-aged to older men who frequent GOODFELLAS on a regular basis. CS# 2 can identify the "regular" customers and provide either their full names or their nicknames. DCSO Officers have corroborated these identities through surveillance and investigation.

25. Along with identifying names, CS# 2 stated that CS# 2 could identify the individual prostitutes that the clients selected on a regular basis and could identify the type of sex act that these clients regularly requested. CS #2 also identified female employees to law enforcement. These identities were also corroborated by law enforcement.

26. CS# 2 stated that unknown, non-regular customers, who enter GOODFELLAS are either run out of GOODFELLAS through a "high" (dollar amount) cover charge or by over-priced drinks of \$10. When an unknown customer enters GOODFELLAS, LOUIS or RUBY will order a dancer/prostitute to get on stage to simulate dancing until the unknown customer leaves. Normally there will not be any dancers/prostitutes dancing, and, that typically the

dancers/prostitutes sit around until a "known" client enters GOODFELLAS.

27. CS# 2 knows through personal experiences and observation, that once a "known" client enters GOODFELLAS, the client will meet and sit down with one of the dancers/prostitutes. The dancer/prostitute and the client will negotiate a deal, which is typically an exchange of United States Currency for a sex act. The dancer/prostitute will accept the money from the client. At that point, the dancer/prostitute will hand the money over to LOUIS or RUBY VENDITTE, at which time the dancer/prostitute will escort the paid client either upstairs to one of the sex act rooms or into the back room (called the kitchen) where the sex act is consummated. After the dancer/prostitute gives RUBY or LOUIS the cash payment from the paid client, RUBY or LOUIS will split the money 50/50 with the dancers/prostitute and will place the dancer's/prostitute's money in an envelope for later retrieval. On some occasions, the envelope will be placed behind the bar for later retrieval.

28. According to CS# 2, RUBY VENDITTE keeps all the "books" (business records) in and on notebook pages. These

records reflect sales of drinks sold and "tricks" (commercial sex acts) turned by the girls. At the end of the evening, RUBY VENDITTE divides out the money earned by each girl and then tears the note page out and takes the page containing business records from that night home to her residence located at Park Wild Avenue, Omaha, Nebraska, also identified as 1526 ½ Park Wild Avenue, Omaha, Nebraska.

29. CS #2 knows that RUBY VENDITTE uses a smart phone that can also be used to access the Internet and serve as a mini computer. CS #2 has also observed laptop computers in the business and specifically recalls female employees and RUBY VENDITTE accessing the Internet through a laptop computer. Although CS #2 is unaware of all online sites visited or viewed at Goodfellas, CS #2 knows that RUBY and the female employees have accessed social media websites on these computers inside Goodfellas.

30. During surveillances of the GOODFELLAS Night Club, which have been ongoing since at least December 26, 2012 to present, DCSO and FBI Task Force Member, Lt. SCOTT WAGNER has identified LOUIS and RUBY VENDITTE'S vehicles as the above listed "Red 2002 Cadillac Seville (Nebraska License plate: 1-

V47)" VIN 1G6KS54Y22U136483 and the "White 2002 Chevrolet Blazer (Nebraska License plate: TCP-057)" VIN 1GNDT13W22K150558, both of which have been observed at the GOODFELLAS Night Club and being occupied by LOUIS and RUBY VENDITTE arriving to and leaving from the business.

31. On September 12, 2013, pursuant to a court order issued by the United States District Court for the District of Nebraska, LT WAGNER initiated tracking from information provided by devices covertly installed on LOUIS VENDITTE's 2002 Red Cadillac Seville SLS 4 door sedan bearing Nebraska License plate 1- V47, VIN 1G6KS54Y22U136483, and LOUIS VENDITTE's 2002 Chevrolet Blazer 4 door utility bearing Nebraska license plate TCP-057, VIN 1GNDT13W22K150558. A summary of this tracking indicates that these vehicles travel to and from the VENDITTE residence and GOODFELLAS. Other frequented locations are University of Nebraska Medical Center and the three casinos in Council Bluffs, Iowa.

32. Based on numerous surveillance reports by LT WAGNER, and other law enforcement officers of the DCSO, to include DEPUTY J STEHLIK and DEPUTY J MASS, physical surveillances indicate that these above vehicles, with occupants, LOUIS and

RUBY VENDITTE arrive and depart GOODFELLAS parking lot, normally between the hours of 1730 hours and 2100 hours, Monday through Friday.

33. While employed at GOODFELLAS, as referenced above, CS# 2 worked with other females. CS# 2 recalled several specific females employed as "dancers/prostitutes" at GOODFELLAS for LOUIS and RUBY VENDITTE. Two of these females include MELANIE JOHNSON, 04/11/1975, and MEGAN BIGELOW 01/25/1977. CS# 2 confirmed that these females have been paid to engage in sex acts with GOODFELLAS' clients by LOUIS and RUBY VENDITTE. The females are paid by the VENDITTEs from cash proceeds collected by the girls from GOODFELLAS' clients.

34. Over the course of this investigation, LT WAGNER has also observed LOUIS and RUBY VENDITTE arrive at and depart from GOODFELLAS with female passengers.

35. Specifically, on January 17, 2013 at 20:26 hours, surveillance officers observed the Red Cadillac Seville (Nebraska License: 1-V47), occupied by LOUIS and RUBY VENDITTE, and passenger, MELANIE JOHNSON, (see paragraph 33 above) depart the GOODFELLAS parking lot after they exited the GOODFELLAS. Surveillance observed this vehicle travel in interstate commerce

from Omaha, Nebraska, into Council Bluffs, Iowa. The vehicle arrived in the area of 23rd Avenue and Avenue 'C', in Council Bluffs, Iowa.

36. On Tuesday, January 29, 2013 at 17:45 hours, LT WAGNER observed the Red Cadillac Seville (Nebraska License: 1-V47), arrive at GOODFELLAS and park in the North parking lot. LT WAGNER observed LOUIS and RUBY VENDITTE, along with a white female identified as MELANIE JOHNSON, exit the Red Cadillac Seville and enter GOODFELLAS.

37. On that same day, at 2012 hours, LT WAGNER observed LOUIS and RUBY VENDITTE, along with MELANIE JOHNSON, exit GOODFELLAS and enter the Red Cadillac Seville. DCSO DEPUTY J MASS followed the Red Cadillac Seville (Nebraska License Plate 1-V47) to the area of 23rd and Avenue "C" in Council Bluffs, Iowa, where MELANIE JOHNSON disembarked from the vehicle.

38. Investigation to date has determined that MELANIE ANN JOHNSON, date of birth 04/11/1975, reported (in public source records) she was living at 2310 Avenue C, Council Bluffs, Iowa, from December 2012 to June 2013. (For information it should be noted that JOHNSON also reported an address of 5418 N. 42nd Street, Omaha, Nebraska, 68111 from January 2011 to July 2013,

and lastly JOHNSON reported an address of 5344 N. 27th Avenue, Omaha, Nebraska from February 2011 to June 2013.) JOHNSON has a criminal history that is reflected under FBI# 397344FC0 and includes: Fugitive from Justice, Theft - Nebraska, 08/25/2004; and Driving under suspension 6th - Nebraska, 11/28/2004. JOHNSON also has multiple violations on her driver's license and criminal and traffic court records. It is therefore likely that JOHNSON would require transportation traveling from her home in Council Bluffs, Iowa, to GOODFELLAS located at 624 South 16th Street, Omaha, Nebraska, to engage in commercial sex acts. And, as referenced above, JOHNSON has been observed being transported in interstate commerce by LOUIS and RUBY VENDITTE.

39. CS# 2 also stated that LOUIS VENDITTE refuses to buy liquor from a vendor and instead will bring bottles of alcohol that he purchases at a liquor store to GOODFELLAS. GOODFELLAS is a "cash only" business, that does not accept checks, nor credit cards.

40. On September 26, 2013, CS #1 met with law enforcement officers and, using recording equipment to capture conversations and video footage entered GOODFELLAS. According to the police report, at approximately 19:24 hours CS #1 met LOUIS VENDITTE at

the front door. They exchanged greetings, at which time, CS #1 reminded LOUIS VENDITTE that CS #1 was "NASH's friend" (DAVID SHIRLEY's friend). LOUIS VENDITTE acted as though he recognized CS #1 and walked away. CS #1 entered GOODFELLAS and sat at the bar. At 19:27 hours LOUIS VENDITTE tells CS #1 that CS #1 "just missed seeing NASH by ten minutes". CS #1 then observed LOUIS VENDITTE on the telephone nearby.

41. CS #1 initiated a conversation with the bartender. At 19:29 hours, in the midst of this conversation, LOUIS VENDITTE returned (from making a telephone call) and stated to the bartender, words to the effect, "He can have whatever he wants." CS #1 then asked the bartender who she (the bartender) would choose to "have a threesome". The bartender pointed at a blonde in GOODFELLAS. The bartender told CS #1 that it would cost \$400.00 (four hundred dollars) plus a \$100.00 (one hundred dollar) tip. CS #1 told the bartender that he did not have the "funds" on this particular evening to which she responded, words to the effect, "You will have fun". The CS #1 stated words to the effect, "No I do not have the 'funds'" and explained that without money, CS #1 would have to come back another day to engage in a 'three person' commercial sex act.

42. CS #1 purchased two drinks (one for CS #1 and one for a girl inside GOODFELLAS) and left. On the way out, at approximately 19:38 hours, CS #1 again engaged in small talk with LOUIS VENDITTE. During this conversation, LOUIS VENDITTE told CS #1 that "NASH" had just left to go to "VIP Lounge" at 90 and Center Streets, Omaha, Nebraska.

43. Your Affiant reviewed pen registers that were obtained through legal process for telephones used by LOUIS VENDITTE and determined that records reflect an outgoing call from telephone number (402) 612-9716 (a cellular telephone number used by LOUIS VENDITTE) to telephone number (402) 660-0114, (a cellular telephone number used by DAVID SHIRLEY) at 19:32:49 hours that lasted 24 (twenty four) seconds and an incoming call from (402)-660-0114 (DAVID SHIRLEY) to (402) 612-9716 (LOUIS VENDITTE) at 19:33:45 hours that lasted 52 (fifty two) seconds. Based on the time stamp on the recording from equipment used by CS #1 on September 26, 2013, these calls occurred shortly after CS #1's initial conversation with LOUIS VENDITTE. Based on my training, experience, and information gleaned through this investigation regarding how this business operates to screen clients, your Affiant concludes that LOUIS VENDITTE conferred with DAVID SHIRLEY on the identity and security (that CS #1 is a "vetted"

member and can receive sex acts/is not a law enforcement officer) of CS #1.

44. Another law enforcement monitored interaction by CS #1 at GOODFELLAS occurred on October 2, 2013, at approximately 18:53 hours. After being provided recording equipment to capture conversations, CS #1 arrived at GOODFELLAS. LOUIS VENDITTE was observed by law enforcement officers arriving at the same time. LOUIS VENDITTE was observed driving the White Blazer, Nebraska license plate TCP 05, VIN 1GNDT13W22K150558. CS #1 and LOUIS VENDITTE made contact with each other at the front door. They exchanged greetings and both walked into GOODFELLAS. CS #1 observed DAVID SHIRLEY, aka NASH, inside. CS #1 walked over to DAVID SHIRLEY and engaged in conversation about cars. A second male customer was asked to leave and a "dancer" described as a white female with tattoos (who told CS #1 that she was from Carter Lake, Iowa) came over to the table. CS #1 and this female discussed commercial sex acts. CS #1 told her that CS #1 wanted two girls and to engage in oral sex. CS #1 told this female that CS #1 knew it would cost more than having sex with only one girl. This female told CS #1 words to the effect, "Let's go upstairs and have sex for \$250.00" (Two hundred and fifty dollars). CS #1 told the girl that he did not

have money to pay for this sex act and that he would be back the following week.

45. CS #1 gave the girl \$20.00 (twenty dollars) for her time. Immediately upon giving her \$20.00 (twenty dollars) LOUIS VENDITTE came over and had what CS #1 described as an "intense" discussion with the female about what had transpired. Based on CS #1's observations while in Goodfellas, it is evident to CS #1 that LOUIS VENDITTE wants to know what is going on in that club at all times in order to be aware of everything occurring at Goodfellas...

46. In addition, on October 2, 2103, during the debriefing of CS #1, CS #1 described the inside of GOODFELLAS. The CS #1 stated that upon entry there is a small island. LOUIS and RUBY VENDITTE sit in this area. There is a small table that supports computer/monitors through which LOUIS VENDITTE is able to monitor cameras that display the exterior of the building. These computer/monitors capture images of individuals and/or vehicles on the Goodfellas property and who enter and exit the business thereby identifying those who regularly patronize Goodfellas. There is a pool table. Regular customers (who are aware of the commercial sex acts) sit at two tables that are on

either side of the pool table. The bar consists of a seating area, a stage, a bar, and a back room in which sex acts can be performed. There was an upstairs area, with access from the main floor, which included bed rooms where the sex acts occur. On each visit, CS #1 has also observed RUBY using a laptop computer.

47. CS #1 has observed RUBY VENDITTE "split up" the money paid by clients for sex acts (between RUBY and the females).

48. On October 3, 2013, an undercover law enforcement officer (UC) entered GOODFELLAS. Upon entry, the UC observed RUBY VENDITTE sitting at "the surveillance table" (see paragraph 46 above). This table is in the middle of the bar and provides images from what appear to be two cameras focused on the outside of the business. The UC asked the bartender, who identified herself as ASHLEY LAST NAME UNKNOWN (LNU) if there was any dancing on this particular evening. ASHLEY told the UC that there were two dancers working this evening. At this point, LOUIS VENDITTE, yelled out, "Hey Morgan get your ass up there". MORGAN LNU got up on stage and danced. Sometime thereafter MORGAN sat with the UC and talked. RUBY called MORGAN away from the UC. MORGAN spoke with RUBY and returned. MORGAN told the

UC, words to the effect, "I'm sorry I have to go, I have a regular" and MORGAN walked over to sit with a man who had entered GOODFELLAS. During this evening both ASHLEY and MORGAN disappeared with two different men. ASHLEY and MORGAN reappeared approximately thirty minutes later.

49. The UC sat in GOODFELLAS for approximately one hour and fifteen minutes during which time, the UC observed RUBY and LOUIS VENDITTE direct the girls. Based on the UC's observations, LOUIS and RUBY VENDITTE appeared to be in control of this business, its operation, and the employees. In addition, the UC observed that any money that was spent in GOODFELLAS "goes to RUBY". GOODFELLAS does not accept credit cards, GOODFELLAS does not ring any sales into a cash register, rather, when the UC was in the bar, all the money was turned over to RUBY.

50. Throughout the surveillances conducted by Task Force Officers, vehicles bearing license plates from surrounding states, to include Minnesota, Iowa, and Missouri, have been observed arriving, (making entry), and departing from GOODFELLAS.

51. In consultation with Senior FBI Special Agents whose primary responsibilities are investigating White Collar Crime, I know that businesses tend to keep records of affairs and trade in a variety of forms to include paper and electronic. I am aware that businesses keep records in secure locations, oftentimes, having the records readily accessible such as in the business itself or in a residence. As mentioned in paragraph 28, RUBY VENDITTE has been observed creating records during business hours at GOODFELLAS and taking these records home with her to her residence. RUBY has been observed as a passenger in either the 2002 Red Cadillac Seville SLS 4 door sedan bearing Nebraska License plate: 1-V47 Vehicle Identification Number (VIN) 1G6KS54Y22U136483 or the 2002 Chevrolet Blazer 4 door utility bearing Nebraska license: TCP-057 VIN 1GNDDT13W22K150558.

52. From my training, experience, and personal use of hand-held electronic devices, such as cellular phones, I have learned that such devices typically store a wide variety of information, including call history logs, contact details, sent and received text messages, photographs, video, pictures, internet browsing history, and e-mail.

VEHICLES

53. The Nebraska Department of Motor Vehicles records reflect that the following vehicles are registered as:

1) Red 2002 Cadillac Seville (Nebraska License plate: 1-V47), registered to RAVANITE Inc., at 623 South 16th Street, Omaha, Nebraska.

and

2) White 2002 Chevrolet Blazer (Nebraska License plate: TCP-057) VIN 1GNDT13W22K150558, registered to LOUIS A. VENDITTE who resides at 1526 Park Wild Avenue, Omaha, Nebraska.

These vehicles have been observed being used in interstate commerce to transport employees to engage in commercial sex acts and/or have been used to transport the owners and records maintained by them to and from Goodfellas.

Ravanite, Inc.

53. According to records received by law enforcement from the Nebraska Liquor Control Commission, an Application for Liquor License was received on or about October 20, 2009, from Ravanite, Inc. d/b/a Ruby's Nite Club identifying its address as 623 S. 16th Street, Omaha. The Application requested a Class C license for the on and off site sale of beer, wine and distilled spirits for the main floor of the establishment. The

Application indicated John W. Wagstaffe was the President of the Corporation, and Louis A. Venditte was the Secretary and Treasurer of the Corporation. The application was signed by John W. Wagstaffe, LOUIS A. VENDITTE, SR., RUBY A. VENDITTE and Amanda K. Gaffney on or about October 2, 2009 as applicants. The Application also included a Certified Copy of the Articles of Incorporation of Ravanite, Inc. filed on July 20, 2009. The Articles of Incorporation indicated the directors of the corporation as Louis A. Venditte, Jr., Christina Hanson, John Wilson Wagstaffe III, and Amanda Gaffney.

CONCLUSION

Based on my training and experience, and the facts as set forth in this affidavit, there is probable cause to believe that in the business of LOUIS and RUBY VENDITTE further identified as GOODFELLAS located at 623 South 16th Street, Omaha, Nebraska, also identified as 613 South 16th Street, Omaha, Nebraska, cell phones used by LOUIS VENDITTE and RUBY VENDITTE (402) 612-9716 and (402) 452-1955, or on their (LOUIS VENDITTE, RUBY VENDITTE's) person, the residence at 1526 Park Wild Avenue, Omaha, Nebraska, also identified as 1526 ½ Park Wild Avenue, Omaha, Nebraska or in vehicles associated with them: a Red 2002 Cadillac Seville (Nebraska License plate: 1-V47) and a White

2002 Chevrolet Blazer (Nebraska License plate: TCP-057 there exists evidence of a crime and contraband or fruits of a crime. Accordingly, search warrants are requested.

REQUEST FOR SEALING

It is respectfully requested that this Court issue an order sealing, until further order of the Court, all papers submitted in support of this application, including the application and search warrant. I believe that sealing this document is necessary because the items and information to be seized are relevant to an ongoing investigation into the criminal organizations as not all of the targets of this investigation will be searched at this time. Based upon my training and experience, I have learned that some criminals actively search for criminal affidavits and search warrants via the internet, and disseminate them to other criminals as they deem appropriate, e.g., by posting them publicly online through Internet forums. Premature disclosure of the contents of this affidavit and related documents may have a significant and negative impact on the continuing investigation and may severely jeopardize its effectiveness.

I declare under penalty and perjury, that the foregoing is true
and correct to the best of my knowledge.

Executed this 9 day of October 2013.

Anna Brewer, Special Agent
Federal Bureau of Investigation

Sworn to and subscribed before me this 9th day of
October 2013.

THOMAS THALKEN
UNITED STATES MAGISTRATE JUDGE
District of Nebraska

ATTACHMENT A

Places to Be Searched

1. Business identified as GOODFELLAS, located at 623 South 16th Street, Omaha, Nebraska, also identified as 613 South 16th Street, Omaha, Nebraska, further described as a two story Black colored brick building with a White sign and Red "GOODFELLAS" and Black "DANCERS" letters that sits North of Jones Street, on the East side of South 16th Street in Omaha, Nebraska. GOODFELLAS has a door facing the west side of the building. See attached photo identified as A-1.
2. The residence located at 1526 Park Wild Avenue, Omaha, Nebraska, 68108, also identified to as 1526 ½ Park Wild Avenue, Omaha, Nebraska, 68108 Street, Omaha, Nebraska further described as a reddish brick house that has a piqued roof. The house faces East but is on the West side of Park Wild Avenue, Omaha, Nebraska. The house is enclosed within a black metal fence that has a gate in front for entry to the property. The front door is covered by a roof. The second story that is visible from the street has two windows. The residence also has a detached garage to the rear. See attached photos identified as A-2 and A-3.
3. Person of RUBY VENDITTE, white female, date of birth 09/01/1948.
4. Person of LOUIS VENDITTE white male, date of birth 08/04/1947.
5. Vehicles associated with LOUIS and RUBY VENDITTE to include:
 - A. Red 2002 Cadillac Seville (Nebraska License plate: 1-V47)

VIN 1G6KS54Y22U136483

and
 - B. White 2002 Chevrolet Blazer (Nebraska License plate: TCP-057) VIN 1GNDT13W22K150558
6. Cellular telephones having associate numbers: (402) 612-9716 and (402) 452-1955

7. Computers, surveillance equipment, cellphones, personal data assistants and other similar handheld devices with electronic storage capability, at the locations referenced in paragraphs 1, 2, and 5(a) and (b).

ATTACHMENT B

Particular Things to be Seized and Searched

Any records utilizing the following business names: GOODFELLAS, RAVANITE, Inc.,

Records, notebooks, memoranda, receipts, ledgers, photographs, lists and employee or customer information relating to Goodfellas

Books, records, lists, receipts, bank savings and loan records of deposit, statements and other bank records, letter of credit, money orders, cashier's checks, passbooks, cancelled checks, certificates of deposit, lease agreements, loan records, customer account information, financial statements, other financial records,

Personnel records for employees or contractors, including personnel lists and contact information, applications, contracts, and business records pertaining to employment of personnel,

Business records for services named in the affidavit, including records of advertisements for the business names and locations.

Personal and business financial documents including documents indicating business operations and expenses, payment for services, personal and business financial transactions, bank statements, financial statements, and payment records from clients, whether received via mail, hand delivery or electronically Business and massage licenses and certifications.

Client lists, ledgers and records, including names, contact information, records of visits and client ratings.

Calendars and appointment schedules, including paper copies and records stored electronically

Cash and other negotiable instruments

Towels, sheets, pillow cases, lotions, oils, customer skin care products, condoms, wrappers, containers, and similar items used to service clients, and bodily fluids

Indicia of ownership and control of the premises or vehicle, including keys, photographs, utility records, lease agreements, addressed letters and envelopes and vehicle registration

Telephone records including call activity and payment records.

Contact names and telephone numbers, e-mail and mailing addresses, dates and times of contacts, attempted contacts and missed calls, sent, received and stored text messages, voice mails and e-mails, and still photographs, video and audio files, whether stored on paper or electronically in desktop computers, laptop or notebook computers, telephone answering or recording machines, or similar electronic devices

Cellular telephones, personal data assistants and other similar handheld devices bearing the telephone number(s) (402) 612-9716 and (402) 452-1955 and all data stored in such devices, including contact names and telephone numbers, e-mail and mailing addresses, dates and times of contacts, attempted contacts and missed calls, sent, received and stored text messages, voice mails and e-mails, still photographs, video and audio files, dates, appointments and other calendar information, and GPS data

Cellular telephones, personal data assistants and other similar handheld devices and its contents

Cameras, surveillance equipment, recording equipment and monitors, photographs, video recordings, including digital photographs and video stored electronically on devices such as cameras, video recorders, compact disks and DVD's, thumb drives, flash drives, hard drives and other computer hardware.

Countersurveillance equipment, and cameras, communication and relay devices and related equipment for remote video surveillance.

Computer hardware consisting of all equipment which can collect, analyze, create, display, convert, store, conceal, or transmit electronic, magnetic, optical, or similar computer impulses or data. Hardware includes but is not limited to any data processing devices (such as central processing units, memory, typewriters, and self-contained "desktop", "laptop", or "notebook" computers); internal and peripheral storage devices (such as fixed disks, external hard disks, floppy disk drives and diskettes, removable magnetic disk storage drives and disks, tape drives, and tapes, optical storage devices, transistor-like binary devices and other memory storage devices); peripheral input/output devices (such as keyboards, printers, scanners, plotters, video display monitors, and optical readers); and related communications devices (such as modems, cables and connections, network transceivers, recording equipment, RAM or ROM units, acoustic couplers, automatic dialers, speed dialers, programmable telephone dialing or signaling devices, and electronic tone-generating devices); as well as any devices, mechanisms, or parts that can be used to restrict access to computer hardware (such as physical keys and locks).

Computer software consisting of digital information which can be interpreted by a computer and any of its related components to direct the way they work. Software can be stored in electronic, magnetic, optical, or other digital form. It commonly includes programs to run operation systems, applications, utilities, compilers, interpreters, and communications programs. Any and all programs necessary for the proper functioning of the computer system.

Computer-related documentation consisting of written, recorded, printed, or electronically stored material which explains or illustrates how to configure or use the computer hardware, software, or other related items. These materials include items relating to the operation of the aforementioned hardware or peripherals.

Computer passwords and other data security devices designed to restrict access to or to hide computer software, documentation, or data: including data security devices consisting of hardware (such as encryption devices), software (such as programs that

encrypt, compress, hide, or "booby-trap" protected data to make it inaccessible or unreadable as well as reverse the process to restore the data), and programming code (such as code that creates "hot" keys which perform security related functions when activated). Encryption keys or encryption passwords, wherever stored and on whatever medium, including paper or electronic medium.

Related communication devices, such as modems, facsimile machines, telephone equipment with built-in memory devices, and answering machines, together with system documentation, operating logs and documentation, software and instruction manuals. All of the above records, whether stored on paper or magnetic media, such as tape cassette, disk, diskette, or on memory storage devices, such as optical disks, programmable instruments, such as telephone, electronic address books, calculators, or any other storage media, together with indicia of use, ownership, possession or control of such records.

Based on my knowledge and training and the experience of other agents and digital forensic experts with whom I have discussed this investigation, I know that in order to completely and accurately retrieve data maintained in computer hardware or on computer software, to ensure accuracy and completeness of such data, and to prevent the loss of the data either from accidental or programmed destruction, it is often necessary that some computer equipment, peripherals, related instructions in the form of manuals and notes, as well as the software utilized to operate such a computer, be seized and subsequently processed by a qualified computer specialist in a laboratory setting. This is true because of the following:

a. The volume of evidence. Computer storage devices (such as hard disks, sim cards, SD cards, diskettes, tapes, laser disks, etc.) can store the equivalent of thousands of pages of information or images. Additionally, a user may seek to conceal criminal evidence by storing it in random order with deceptive file names. Searching authorities are required to examine all the stored data to determine which particular files are evidence or instrumentalities of criminal activity. This sorting process can take weeks or months, depending on the volume of data

stored, and it would be impractical to attempt this kind of data analysis on-site.

b. Technical requirements. Searching computer systems for criminal evidence can be a highly technical process that can require expert skills and a properly controlled environment. It is often difficult to determine the hardware and software used on a system to be searched before the search is executed, and the vast array of computer hardware and software available requires even computer experts to specialize in some systems and applications. As a result, it is difficult to know prior to a search: (1) whether a specific expert or search protocol may be required; (2) if so, which expert may be qualified to analyze the system and its data; and (3) whether and what type of controlled environment may be required. Data search protocols are exacting scientific procedures designed to protect the integrity of the evidence and to recover even "hidden", erased, compressed, password-protected, or encrypted files. Because computer evidence can be vulnerable to inadvertent or intentional modification or destruction (both from external sources or from destructive code imbedded in the system as a "booby trap"), a controlled environment may be necessary to complete an accurate analysis. Further, such searches often require the seizure of most or all of a computer system's input/output peripheral devices, related software, documentation, and data security devices (including passwords) so that, if necessary, a qualified computer expert can accurately retrieve the system's data in a laboratory or other controlled environment.

Due to the volume of the data at issue and the technical requirements set forth above, it may be necessary that the above referenced equipment, software, data, and related instruction be seized and subsequently processed by a qualified computer specialist in a laboratory setting. Under appropriate circumstances, some types of computer equipment can be more readily analyzed and pertinent data seized on-site, thus eliminating the need for its removal from the premises. One factor used in determining whether to analyze a computer on-site or to remove it from the premises is whether the computer constitutes an instrumentality of an offense and is thus subject

to immediate seizure as such--or whether it serves as a mere repository for evidence, a particular device can be more readily, quickly, and thus less intrusively, analyzed off site, with due considerations given to preserving the integrity of the evidence. This, in turn, is often dependent upon the amount of data and number of discrete files or file areas that must be analyzed, and this is frequently dependent upon the particular type of computer hardware involved. As a result, it is ordinarily impossible to appropriately analyze such material without removing it from the location where it is seized. Based upon my knowledge, training, and the experience of other law enforcement personnel with whom I have spoken, I am aware that searches and seizures of evidence from computers taken from the premises commonly require agents to seize most or all of a computer system's input/output peripheral devices, in order for a qualified computer expert to accurately retrieve the system's data in a laboratory or other controlled environment. Therefore, in those instances where computers are removed from the premises, in order to fully retrieve data from a computer system, investigators must seize all the magnetic storage devices as well as the central processing units (CPUs) and applicable keyboards and monitors which are an integral part of the processing unit. If, after it becomes apparent that these items are no longer necessary to retrieve and preserve the data evidence, such materials and/or equipment will be returned within a reasonable time.

The analysis of electronically stored data, whether performed on-site or in a laboratory or other controlled environment, may entail any or all of several different techniques. Such techniques may include, but shall not be limited to, surveying various file "directories" and the individual files they contain (analogous to looking at the outside of a file cabinet for the markings it contains and opening a drawer capable of containing pertinent files, in order to locate the evidence and instrumentalities authorized for seizure by the warrant); "opening" or reading the first few "pages" of such files in order to determine their precise contents; "scanning" storage areas to discover and possibly recover recently deleted data; scanning storage areas for deliberately hidden files; and performing electronic "key-word" searches through all electronic

storage areas to determine occurrences of language contained in such storage areas exist that are intimately related to the subject matter of the investigation.

Re: Seasons Greetings

It's Goodfella's strip club at 16th & Jones. They are open from 6 to 9, Monday thru Saturday. Have fun!

What's up brother! Just wanted to give you a shout and see what's up with you. It was great to finally meet you at the MnG. I had a good time finally meeting some of the people from the board, especially the ladies!

Anyway, I didn't want to talk about it in front of the other guys, but I was wondering if you were still doing Nash's WH challenge? I didn't think that the MnG was the best place to discuss it, but if you are still up for it, I would be interested in visiting the fine establishment with you. I'm always up for something new.

Anyway, I hope all is well with you and that you have a great Christmas! Take care brother!

The Whore House Challenge

Who is ready for the Whore House Challenge (WHC)? I've been getting quite a few PM's from guys wanting to expand their horizons in the UTR brothel scene. It's obvious why I can't just tell everyone, so I'm going to attempt it this way. My goal of all this is to get another long time and active member of ECCIE who will participate and verify that a true to life brothel does exist in our area (there are 2, but the other one is not for the weak at heart). Besides, WTF, it's something different.

Here's the rules (I'm making them up while typing).

1. Must have been to the recent M & G.
2. I must have seen you at the M & G.
3. Suggest having 4 to 5 bills ready to spend on ho's. The prices run \$100 to \$200 a shot, so I don't know how many you want to do, but you always want to be prepared in case you want to do more. You'll get (if I can talk the madam into it) Nash's frequent flyer discount of \$100 for a short time. Some idiots are paying \$400 to \$700 for the same service (economy ruiners).
4. I'll buy the beer. Yeah, I know I'm a good guy, lol.
5. I can't guarantee the number of gals that will be working, but it's usually between 3 to 6. It's hit or miss depending on the day.
6. Can keep everything UTR.

Anyhow, should be fun and the person will become a verified regular of the place so he will be able to call it his second home like I do, lol.

All statements, reviews and everything else is for amusement purposes only, YMMV. Sometimes one nut isn't enough. 🍆

You sir are a brave man. I would have kept this to PM's but that's just my looking over the shoulder routine.

WHC challenge rules!

Attachment D

UNITED STATES DISTRICT COURT

for the
District of NebraskaIn the Matter of the Search of
(Briefly describe the property to be searched
or identify the person by name and address)Goodfellas business at 613/623 South 16th Street,
Omaha, Nebraska, Ruby Venditte, Louis Venditte, and
electronic equipment

Case No. 8:13MJ299

SEARCH AND SEIZURE WARRANT

SEALED

To: Any authorized law enforcement officer

An application by a federal law enforcement officer or an attorney for the government requests the search
of the following person or property located in the _____ District of _____ Nebraska

(identify the person or describe the property to be searched and give its location):

Goodfellas business at 613/623 South 16th Street, Omaha, Nebraska, Ruby Venditte (her person), Louis Venditte (his
person), cellular telephones, and electronic equipment, specifically identified in paragraphs 1,3,4,6,7 of Attachment A
and A-1The person or property to be searched, described above, is believed to conceal (identify the person or describe the
property to be seized):

See Attachment B.

I find that the affidavit(s), or any recorded testimony, establish probable cause to search and seize the person or
property.

YOU ARE COMMANDED to execute this warrant on or before

October 17, 2013
(not to exceed 14 days)☒ in the daytime 6:00 a.m. to 10 p.m.☐ at any time in the day or night as I find reasonable cause has been
established.Unless delayed notice is authorized below, you must give a copy of the warrant and a receipt for the property
taken to the person from whom, or from whose premises, the property was taken, or leave the copy and receipt at the
place where the property was taken.The officer executing this warrant, or an officer present during the execution of the warrant, must prepare an
inventory as required by law and promptly return this warrant and inventory to United States Magistrate Judge
THOMAS D. THALKEN

(name)

☐ I find that immediate notification may have an adverse result listed in 18 U.S.C. § 2705 (except for delay
of trial), and authorize the officer executing this warrant to delay notice to the person who, or whose property, will be
searched or seized (check the appropriate box) ☐ for _____ days (not to exceed 30).☐ until, the facts justifying, the later specific date of _____.

Date and time issued:

10/9/13 @ 11:10 AM

Judge's signature

City and state: Omaha, Nebraska

THOMAS D. THALKEN, U.S. Magistrate Judge

Printed name and title

AO 93 (Rev. 12/09) Search and Seizure Warrant (Page 2)

Return

Case No.:

8:13MJ299

Date and time warrant executed: .

Copy of warrant and inventory left with:

Inventory made in the presence of:

Inventory of the property taken and name of any person(s) seized:

Certification

I declare under penalty of perjury that this inventory is correct and was returned along with the original warrant to the designated judge.

Date: _____

Executing officer's signature_____
Printed name and title

ATTACHMENT A

Places to Be Searched

1. Business identified as GOODFELLAS, located at 623 South 16th Street, Omaha, Nebraska, also identified as 613 South 16th Street, Omaha, Nebraska, further described as a two story Black colored brick building with a White sign and Red "GOODFELLAS" and Black "DANCERS" letters that sits North of Jones Street, on the East side of South 16th Street in Omaha, Nebraska. GOODFELLAS has a door facing the west side of the building. See attached photo identified as A-1.
2. The residence located at 1526 Park Wild Avenue, Omaha, Nebraska, 68108, also identified to as 1526 ½ Park Wild Avenue, Omaha, Nebraska, 68108 Street, Omaha, Nebraska further described as a reddish brick house that has a piqued roof. The house faces East but is on the West side of Park Wild Avenue, Omaha, Nebraska. The house is enclosed within a black metal fence that has a gate in front for entry to the property. The front door is covered by a roof. The second story that is visible from the street has two windows. The residence also has a detached garage to the rear. See attached photos identified as A-2 and A-3.
3. Person of RUBY VENDITTE, white female, date of birth 09/01/1948.
4. Person of LOUIS VENDITTE white male, date of birth 08/04/1947.
5. Vehicles associated with LOUIS and RUBY VENDITTE to include:
 - A. Red 2002 Cadillac Seville (Nebraska License plate: 1-V47)

VIN 1G6KS54Y22U136483

and
 - B. White 2002 Chevrolet Blazer (Nebraska License plate: TCP-057) VIN 1GNDDT13W22K150558
6. Cellular telephones having associate numbers: (402) 612-9716 and (402) 452-1955

7. Computers, surveillance equipment, cellphones, personal data assistants and other similar handheld devices with electronic storage capability, at the locations referenced in paragraphs 1, 2, and 5(a) and (b).

A-1

ATTACHMENT B

Particular Things to be Seized and Searched

Any records utilizing the following business names: GOODFELLAS, RAVANITE, Inc.,

Records, notebooks, memoranda, receipts, ledgers, photographs, lists and employee or customer information relating to Goodfellas

Books, records, lists, receipts, bank savings and loan records of deposit, statements and other bank records, letter of credit, money orders, cashier's checks, passbooks, cancelled checks, certificates of deposit, lease agreements, loan records, customer account information, financial statements, other financial records,

Personnel records for employees or contractors, including personnel lists and contact information, applications, contracts, and business records pertaining to employment of personnel,

Business records for services named in the affidavit, including records of advertisements for the business names and locations.

Personal and business financial documents including documents indicating business operations and expenses, payment for services, personal and business financial transactions, bank statements, financial statements, and payment records from clients, whether received via mail, hand delivery or electronically Business and massage licenses and certifications.

Client lists, ledgers and records, including names, contact information, records of visits and client ratings.

Calendars and appointment schedules, including paper copies and records stored electronically

Cash and other negotiable instruments

Towels, sheets, pillow cases, lotions, oils, customer skin care products, condoms, wrappers, containers, and similar items used to service clients, and bodily fluids

Indicia of ownership and control of the premises or vehicle, including keys, photographs, utility records, lease agreements, addressed letters and envelopes and vehicle registration

Telephone records including call activity and payment records.

Contact names and telephone numbers, e-mail and mailing addresses, dates and times of contacts, attempted contacts and missed calls, sent, received and stored text messages, voice mails and e-mails, and still photographs, video and audio files, whether stored on paper or electronically in desktop computers, laptop or notebook computers, telephone answering or recording machines, or similar electronic devices

Cellular telephones, personal data assistants and other similar handheld devices bearing the telephone number(s) (402) 612-9716 and (402) 452-1955 and all data stored in such devices, including contact names and telephone numbers, e-mail and mailing addresses, dates and times of contacts, attempted contacts and missed calls, sent, received and stored text messages, voice mails and e-mails, still photographs, video and audio files, dates, appointments and other calendar information, and GPS data

Cellular telephones, personal data assistants and other similar handheld devices and its contents

Cameras, surveillance equipment, recording equipment and monitors, photographs, video recordings, including digital photographs and video stored electronically on devices such as cameras, video recorders, compact disks and DVD's, thumb drives, flash drives, hard drives and other computer hardware.

Countersurveillance equipment, and cameras, communication and relay devices and related equipment for remote video surveillance.

Computer hardware consisting of all equipment which can collect, analyze, create, display, convert, store, conceal, or transmit electronic, magnetic, optical, or similar computer impulses or data. Hardware includes but is not limited to any data processing devices (such as central processing units, memory, typewriters, and self-contained "desktop", "laptop", or "notebook" computers); internal and peripheral storage devices (such as fixed disks, external hard disks, floppy disk drives and diskettes, removable magnetic disk storage drives and disks, tape drives, and tapes, optical storage devices, transistor-like binary devices and other memory storage devices); peripheral input/output devices (such as keyboards, printers, scanners, plotters, video display monitors, and optical readers); and related communications devices (such as modems, cables and connections, network transceivers, recording equipment, RAM or ROM units, acoustic couplers, automatic dialers, speed dialers, programmable telephone dialing or signaling devices, and electronic tone-generating devices); as well as any devices, mechanisms, or parts that can be used to restrict access to computer hardware (such as physical keys and locks).

Computer software consisting of digital information which can be interpreted by a computer and any of its related components to direct the way they work. Software can be stored in electronic, magnetic, optical, or other digital form. It commonly includes programs to run operation systems, applications, utilities, compilers, interpreters, and communications programs. Any and all programs necessary for the proper functioning of the computer system.

Computer-related documentation consisting of written, recorded, printed, or electronically stored material which explains or illustrates how to configure or use the computer hardware, software, or other related items. These materials include items relating to the operation of the aforementioned hardware or peripherals.

Computer passwords and other data security devices designed to restrict access to or to hide computer software, documentation, or data: including data security devices consisting of hardware (such as encryption devices), software (such as programs that

encrypt, compress, hide, or "booby-trap" protected data to make it inaccessible or unreadable as well as reverse the process to restore the data), and programming code (such as code that creates "hot" keys which perform security related functions when activated). Encryption keys or encryption passwords, wherever stored and on whatever medium, including paper or electronic medium.

Related communication devices, such as modems, facsimile machines, telephone equipment with built-in memory devices, and answering machines, together with system documentation, operating logs and documentation, software and instruction manuals. All of the above records, whether stored on paper or magnetic media, such as tape cassette, disk, diskette, or on memory storage devices, such as optical disks, programmable instruments, such as telephone, electronic address books, calculators, or any other storage media, together with indicia of use, ownership, possession or control of such records.

Based on my knowledge and training and the experience of other agents and digital forensic experts with whom I have discussed this investigation, I know that in order to completely and accurately retrieve data maintained in computer hardware or on computer software, to ensure accuracy and completeness of such data, and to prevent the loss of the data either from accidental or programmed destruction, it is often necessary that some computer equipment, peripherals, related instructions in the form of manuals and notes, as well as the software utilized to operate such a computer, be seized and subsequently processed by a qualified computer specialist in a laboratory setting. This is true because of the following:

a. The volume of evidence. Computer storage devices (such as hard disks, sim cards, SD cards, diskettes, tapes, laser disks, etc.) can store the equivalent of thousands of pages of information or images. Additionally, a user may seek to conceal criminal evidence by storing it in random order with deceptive file names. Searching authorities are required to examine all the stored data to determine which particular files are evidence or instrumentalities of criminal activity. This sorting process can take weeks or months, depending on the volume of data

stored, and it would be impractical to attempt this kind of data analysis on-site.

b. Technical requirements. Searching computer systems for criminal evidence can be a highly technical process that can require expert skills and a properly controlled environment. It is often difficult to determine the hardware and software used on a system to be searched before the search is executed, and the vast array of computer hardware and software available requires even computer experts to specialize in some systems and applications. As a result, it is difficult to know prior to a search: (1) whether a specific expert or search protocol may be required; (2) if so, which expert may be qualified to analyze the system and its data; and (3) whether and what type of controlled environment may be required. Data search protocols are exacting scientific procedures designed to protect the integrity of the evidence and to recover even "hidden", erased, compressed, password-protected, or encrypted files. Because computer evidence can be vulnerable to inadvertent or intentional modification or destruction (both from external sources or from destructive code imbedded in the system as a "booby trap"), a controlled environment may be necessary to complete an accurate analysis. Further, such searches often require the seizure of most or all of a computer system's input/output peripheral devices, related software, documentation, and data security devices (including passwords) so that, if necessary, a qualified computer expert can accurately retrieve the system's data in a laboratory or other controlled environment.

Due to the volume of the data at issue and the technical requirements set forth above, it may be necessary that the above referenced equipment, software, data, and related instruction be seized and subsequently processed by a qualified computer specialist in a laboratory setting. Under appropriate circumstances, some types of computer equipment can be more readily analyzed and pertinent data seized on-site, thus eliminating the need for its removal from the premises. One factor used in determining whether to analyze a computer on-site or to remove it from the premises is whether the computer constitutes an instrumentality of an offense and is thus subject

to immediate seizure as such--or whether it serves as a mere repository for evidence, a particular device can be more readily, quickly, and thus less intrusively, analyzed off site, with due considerations given to preserving the integrity of the evidence. This, in turn, is often dependent upon the amount of data and number of discrete files or file areas that must be analyzed, and this is frequently dependent upon the particular type of computer hardware involved. As a result, it is ordinarily impossible to appropriately analyze such material without removing it from the location where it is seized. Based upon my knowledge, training, and the experience of other law enforcement personnel with whom I have spoken, I am aware that searches and seizures of evidence from computers taken from the premises commonly require agents to seize most or all of a computer system's input/output peripheral devices, in order for a qualified computer expert to accurately retrieve the system's data in a laboratory or other controlled environment. Therefore, in those instances where computers are removed from the premises, in order to fully retrieve data from a computer system, investigators must seize all the magnetic storage devices as well as the central processing units (CPUs) and applicable keyboards and monitors which are an integral part of the processing unit. If, after it becomes apparent that these items are no longer necessary to retrieve and preserve the data evidence, such materials and/or equipment will be returned within a reasonable time.

The analysis of electronically stored data, whether performed on-site or in a laboratory or other controlled environment, may entail any or all of several different techniques. Such techniques may include, but shall not be limited to, surveying various file "directories" and the individual files they contain (analogous to looking at the outside of a file cabinet for the markings it contains and opening a drawer capable of containing pertinent files, in order to locate the evidence and instrumentalities authorized for seizure by the warrant); "opening" or reading the first few "pages" of such files in order to determine their precise contents; "scanning" storage areas to discover and possibly recover recently deleted data; scanning storage areas for deliberately hidden files; and performing electronic "key-word" searches through all electronic

storage areas to determine occurrences of language contained in such storage areas exist that are intimately related to the subject matter of the investigation.
